

EnviroWrappe

Building Envelope Protection Solutions

Enviro Groupe Corp. - Ontario, Canada

Enviro Groupe Corp. headquartered in Ontario, Canada has launched a complete line of building envelope protection solutions under the EnviroWrappe label. Based on the proven industry leading Dominus Innovations BEP technology, the new line of air and moisture barrier products will be marketed in Canada exclusively through the Enviro Groupe Corp. franchise network.

The initial components of the distinctive green color, eco-friendly

EnviroWrappe product line include: **EnviroWrappe Liquid Flashing 2103**, a liquid applied flashing/sealant designed for weatherproof window and door installations; **EnviroWrappe Joint Filler 2203**, a fiber reinforced joint and seam filler used for bridging gaps up to ¼ inch between multiple substrates ; **EnviroWrappe Liquid Wrap 2303**, a thin mil, liquid applied, seamless membrane building air and moisture protection coating that can be spray applied with an airless sprayer; and **EnviroWrappe Flash 'N Wrap RG 2403**, a roller grade, liquid applied combination flashing and building wrap air and moisture protection technology that can be brush or roller applied.

EnviroWrappe is a low VOC, fully adhered, eco-friendly system that not only provides building envelope protection against unwanted moisture and mold, but also improves the energy efficiency of the building envelope.

EnviroWrappe is one of a number of specialty construction solutions offered throughout Canada by the Enviro Groupe Corp. franchise network. The company is also the nation's leading provider of rubber paving solutions for crack resistant sidewalks, driveways, pool decks, golf cart paths and recreational activity surfaces through its Enviro Paving franchises. www.envirowrappe.com
